

## ONLY FOREVER YOUNG BBL IS CLINICALLY PROVEN

to fight the aging process at a deeper level

- Unique light treatment works from the inside out
- Long-term study shows that regular treatments produce skin that looks younger than it did before starting treatments—up to ten years and counting!
- Improvement in skin discoloration, tone and texture
- Fast, easy, noninvasive procedure with no downtime
- Appropriate for women and men of all ages to improve and maintain the appearance of young, healthy skin

Ask your clinician if you can start today...

## A NEW APPROACH to younger looking skin

For as long as women and men have been concerned about aging, there have been promises of younger-looking skin. Contrary to popular belief, topical products can't penetrate the skin's building blocks, where so much of the aging process happens.

Introducing **Forever Young BBL** from Sciton, a revolutionary treatment that sends light energy deep into the skin to boost your body's natural ability to fight aging.

The result? **Skin that's visibly younger looking, year after year .**

“ I couldn't be happier with my Forever Young BBL treatment program - my skin looks better today than it did a decade ago! ”

- Kathy, 47 years old

## FOREVER YOUNG BBL

### skin that looks ten years younger

Imagine taking a photo a decade from now and looking better than you do today. It may sound impossible, but that's what **Forever Young BBL** can do. It was proven in a 10-year clinical study — one of the longest on record to **show the results of a skin care regimen**.

Patients received 1 or more **Forever Young BBL** treatments per year for an average of ten years. At the end of the study, Doctors were shown before and after pictures and asked to evaluate the patients ages.

“Wow! This is the best investment I could ever make in my appearance. I am 53 and when I tell people I have children that are almost 30, they wonder how much cosmetic surgery I’ve had done. The answer is none – just Forever Young!”  
– Erica, 53 years old

## THE PROOF behind the promise

When looking at the photos, doctors were able to accurately guess the age of the “before” pictures. However, when they were shown the after pictures, the judges generally believed the patients to be 11 years younger than their actual age. In other words – **they looked younger than when they started the study almost 11 years prior!**

The results were so startling, the authors of the study concluded: **“patients who maintain a regular annual or bi-annual regimen of BBL treatments over 5 to 11 years can reduce and delay the long-term signs of skin aging such as photodamage, spider veins, and skin laxity in a natural-looking way.”**

## CUSTOMIZED for your skin

Your clinician can fine tune **Forever Young BBL** for your skin type and for your ideal results. The long term effects have been proven in most skin types, including people with olive to darker skin. Men, women, fair, dark...almost anyone can enjoy the benefits of **Forever Young BBL**.

“ Forever Young BBL is extraordinary! It is extremely easy to select the perfect settings during a treatment, which allows my Asian patients to obtain superior results with absolute safety and comfort. ”

- Kei Negish , MD  
Tokyo Women's Medical University

## ANY AGE

### any area of your body

Forever Young BBL isn't just a beauty treatment. It's a preventive regimen - possibly the best investment anyone can make in his or her skin. Both men and women with almost any skin type can protect against the sun and environmental damage that adds up over time. In fact, the best time to think about the effects of aging is before they appear. Since the ten-year study shows that regular Forever Young BBL treatments stop the skin's appearance of aging... why wait? The face isn't the only place that shows our age. Stop the appearance of aging on other areas of skin, such as:

BACK OF HANDS | NECK | CHEST | SHOULDERS
